

S-D-ARX-6UH-6ch Synthesized + Dual Conversion + Universal + DSP Receiver

Dimensions:	1.3"x0.75"x0.32"(33x18.9x8.2mm)
Weight With Antenna:	0.32oz/9.6g (with shrink wrap)
Weight w/o Antenna:	0.30oz/9.2g (with shrink wrap)
Sensitivity:	better than 1.5 μ V
Selectivity:	\pm 8kHz at 65dB down
Number of Channels:	6
Filtering:	Dual tuned RF circuitry
Filtering:	Dual 4 pole ceramic filter
Filtering:	DSP filtering with mild algorithm
Modulation:	FM/PPM
Shift Polarity:	Auto-Detect (positive or negative)
Case:	Plastic Case
Operating Voltage:	4.8V~7.2VDC
Operating Current:	7mA
Resolution:	1024 DPI Resolution

- I. **Lightest and Smallest Synthesized Receiver**
- II. **Long Range With a sensitivity of better than 1.5 μ V**
- III. **Ultra Narrow that all receivers use 4 pole ceramic IF filter and make sure all the receivers have an ultra narrow band.**
- IV. **AGC and High IP3 Performance**
It adds an AGC circuit to make itself have a higher IP3. With this technology, it can reject adjacent interference and high frequency block effectively.
- V. **Auto-detecting**
auto-detects the shift type (positive or negative) and is compatible with most brand transmitters.
- VI. **DSP decoding technology is used by all top grade receivers. Based on the experience of the manufacturing crystal receiver, the arithmetic is more advanced and it works more reliable.**
- VII. **PPL Frequency Tune - The frequency can be changed easily with PPL technology.**
- VIII. **TSR Transmitter Signal Recognition (TSR)**
The receiver "learns" the characteristics and specific signal signatures of your transmitter when you power it up
- IX. **Triple tuned RF circuitry**
